

8 - 10kW¹

Automatic Home Generator Systems

Smaller and Smarter

Give your family the peace of mind that comes with knowing that if the power goes out, your lights will still be on.

Our 8kW¹-10kW¹ has the smallest standby generator footprint of its class. Its compact design, convenient placement options and comprehensive warranty make it the best choice for homeowners with small to medium properties.

The 8kW¹ Home Generator System by GE keeps the essentials powered in your home. The lights stay on. The refrigerator keeps things cold. The furnace keeps you toasty warm on a cold winter's night. The 10kW¹ standby generator provides enough power for more than just the essentials by managing up to 8 high-wattage appliances with Symphony[®] II Power Management.

Enjoy peace of mind from GE Generator Systems. The smart choice.

To learn more, visit www.GEgenerators.com

Backed by 130 years of providing the latest technology, GE is committed to providing peace of mind to our customers. GE is one of the fastest growing home generator system brands in the country and provides a managed whole house solution to back up power. You already trust our brand for your appliances, now you can count on us to keep them running during an outage.

The longest, most comprehensive limited warranty in the industry. We offer a 4-year limited parts and labor warranty², so you can be assured of our commitment to quality.

Providing Peace of Mind

Automatic

The system continuously monitors your home's connection to utility power. The generator starts automatically when there is an outage and shuts off automatically when utility power is restored.

Premium Engine

Newly designed for standby applications, Briggs & Stratton engines deliver improved reliability, performance and durability to meet your power demands during a power outage.

Designed Around Your Life

Smallest Standby Generator

Featuring a new space-saving design, the compact 8kW¹ - 10kW¹ has the smallest standby generator footprint of its class. Its unobtrusive design makes it a perfect fit for homeowners with smaller properties.

Convenient Placement Options

Our 8kW¹ - 10kW¹ standby generators can be placed as close as 18" from the home in accordance with National Fire Protection Agency testing standard³. Our 8kW¹-10kW¹ standby generator is the best choice for homeowners with tight lot lines.

Easy Monitoring

Each generator system comes with a wireless monitor for inside your home, so you know your generator is working without ever having to go outside.

Available Accessories

Maintenance kit helps you complete scheduled and preventative maintenance on your standby generator. Designed specifically for your generator's needs, each maintenance kit contains oil and air filters, an oil funnel and spark plug(s).

Cold Weather Kit ensures smooth operation in the winter months with the Cold Weather Kit for GE Generator Systems. The thermostatically controlled battery warmer and block heater activate as the temperature drops helping the standby generator operate in colder temperatures.

Not for Prime Power or use where standby systems are legally required, for serious life safety or health hazards, or where lack of power hampers rescue of fire-fighting operations.

¹ This generator is rated in accordance with UL (Underwriters Laboratories) 2200 (stationary engine generator assemblies) and CSA (Canadian Standards Association) standard C22.2 No. 100-04 (motors and generators)

² Warranty details available at www.GEgenerators.com

³ Installations must strictly comply with all applicable codes, industry standards, laws, regulations and provided installation manual. Running engines give off carbon monoxide, an odorless, colorless, poisonous gas so it is important to keep exhaust gas away from any windows, doors, ventilation intakes or crawl spaces. The installation manual contains specific instructions related to generator placement in addition to NFPA 37, including the requirement that carbon monoxide detectors be installed and maintained in your home

⁴ Fuel consumption rates are estimated based on normal operating conditions at ½ load. Generator operation may be greatly affected by elevation and the cycling operation of multiple electrical appliances - fuel flow rates may vary depending on these factors.
